

## WHAT IS THE RITE TOOL KIT?

Top athletes practice with the right tools (equipment) to improve their sport, yet employee training rarely uses tools for continue learning... Until now! Using the RITE Tool Kit along with Emotional intelligence (EI) and Social Intelligence (SI) skills, is what sets us apart.

At RITE Academy, our programs include unique Tools for each student to work with and learn from, during and after class. These tools allow the learning to continue personally and professionally well after the class is over. It takes 21 days to change a habit and improve behavior. RITE Tools help create change.

Executive leaders have said, the RITE tools provide a means for practice and accountability after the training, a priceless feature most have never seen before. These tools improve employee interaction with co-workers and the community, while improving departmental morale, and helping to build community trust.

RITE Academy is changing the way we look at Cultural Diversity for law enforcement, corrections, and public service professionals. Cultural change starts with each individual's ability to understand and control their emotions, especially under pressure situations. Racial Intelligence is improving officer wellness, the needed pillar of strength for improving overall employee performance.
